

All You Need to Know about Myopia

Normal eye

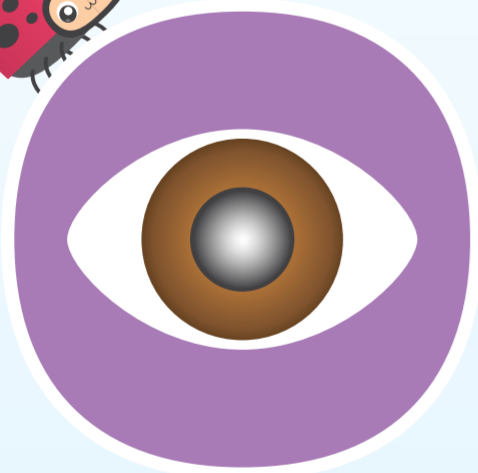

V.S.

Myopic eye

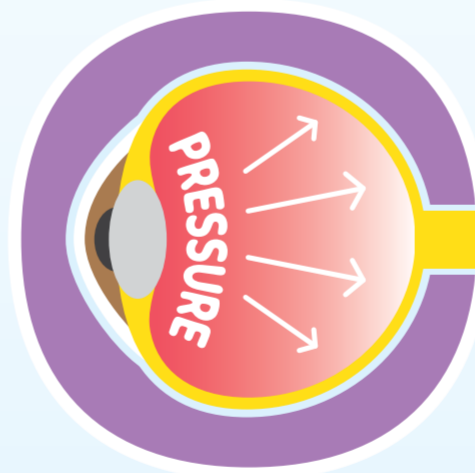

The worse the myopia is, the longer the eyeball length becomes. A stretched eyeball can lead to serious problems with vision

Complications of high myopia

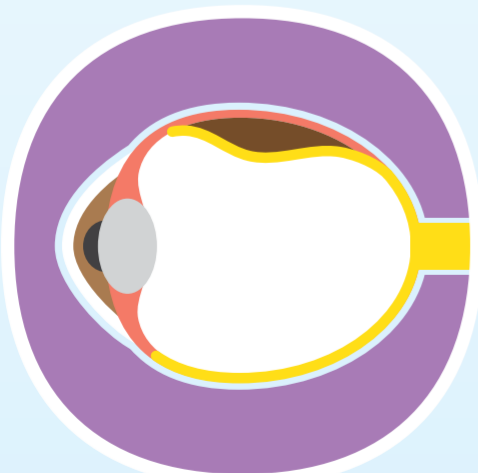

Cataracts

The lens becomes cloudy, causing blurred vision

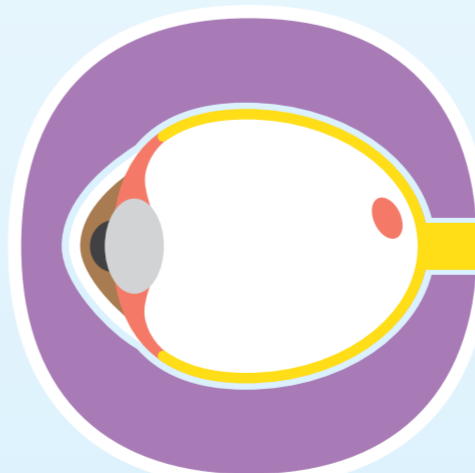

Glaucoma

Increased fluid pressure in the eyeball can cause vision loss

Retinal detachment

The retina pulls away from the wall of the eye, causing blindness

Macular degeneration

The macula gets damaged, causing reduced vision
