BUILD A PLAYHOUSE

Cardboard boxes are easy finds at home so put them into good use with this fun project: Build a playhouse with your kids, for your kids! It is an easy DIY that can be a great bonding activity and will keep your kid entertained for hours to come.

For some extra fun, consider letting your child paint and decorating it. Let their imagination develop and grow with a cardboard box and some materials.

It can be a little house or hideaway, a fort or just a cosy nook. Let your child take the lead and help foster their creativity!

WHAT YOU WILL NEED:

CARDBOARD BOXES

SCISSORS

TAPE

STATIONERY

STEP 1:

Start with an empty cardboard box. Position it on it's side so that the opening is facing you.
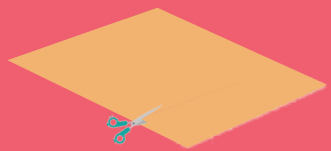

STEP 2:

Cut off the top of the box and save the piece for later. Add tape to secure the back and bottom flaps to the sides of the box.
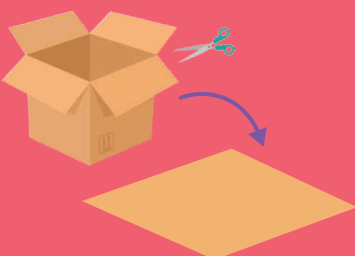

STEP 3:

Take the extra piece from step 1 and cut off around 1/4 to create the steepness of the roof. If you would like a flatter roof, cut it until it's at the desired height.
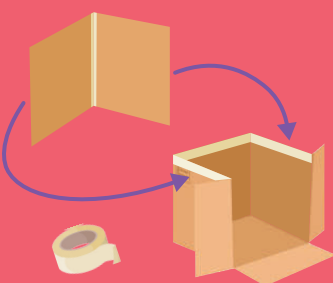

STEP 4:

From another cardboard box, cut out another roof piece that is the same size as the first. Tape the two pieces of cardboard together on one side to form the roof.

STEP 5:

Tape the sides of the roof to the cardboard playhouse and it's done! Let your child decorate and furnish it with their favourite colours and toys!
